CÉSAR VILLEGAS

Computer Science Student

About Me

I'm a Computer Science student on his fourth semester of my degree. I have taken subjects such as Data Structures, Modeling & Programming, Database Fundamentals, Computational Logics, Organization & Computer Architecture, etc. I have worked on some school projects, either with friends, as a team for a special subject or alone such as a virtual store on terminal, or a chat for mobile phones built with React Native and gluestack. I have 1 year and a half of experience programming and using helpful tools for it like GitHub and Visual Studio Code. I know very well how to work under pressure, I'm a very creative person and I can propose solutions for a specific problem.
